

Emissions Theory and Diagnostics

SECTION 1

Introduction

- 5-Gas Theory
- Emissions History
- OBD II

SECTION 2

PCV

- System Function
- Failure Diagnosis

SECTION 3

EGR

- EGR Theory
- Vacuum Systems
- Backpressure Systems
- DPFE Systems
- Linear Systems

SECTION 4

O₂ Sensors & Fuel Control

- Performance Testing
- Heater Testing
- Fuel Trim Diagnosis

SECTION 5

Converters & AIR Injection

- Converter Theory
- Efficiency Testing
- AIR System Theory
- AIR System Testing

SECTION 6

EVAP

- EVAP Overview
 - Leak Testing
 - Component Testing
 - Efficiency Testing
-

INTRODUCTION CONTENTS

INTRODUCTION

The 5 Gases

Overview.....	1-2
Basic Combustion Chemistry	1-2
Carbon Dioxide (CO ₂) & Oxygen (O ₂)	1-2
Hydrocarbons (HC) & Carbon Monoxide (CO)	1-3
Oxides of Nitrogen (NO _x)	1-4
'Normal' Gas Levels.....	1-5
Gas Relationships.....	1-6
Catalyst Gas Conversion	1-7
Diagnosing by Gas Failure.....	1-8
Emissions Repair Warning.....	1-8

History of Emissions Controls

Overview.....	1-9
PCV Systems.....	1-9
EPA Formation	1-9
EGR Systems	1-10
High-Energy Ignition Systems.....	1-10
Catalytic Converters.....	1-11
EPA Timeline	1-11
Computerized Feedback Fuel Control Systems	1-11
The 1990 Clean Air Act.....	1-12
Alternative Fuels & Service Information Rules	1-12
Motor Vehicle Owners' Right to Repair Act of 2005.....	1-12

OBD II Systems

OBD II Overview.....	1-13
Monitor Trips & Drive Cycles.....	1-13
Similar Conditions	1-14
Continuous & Non-Continuous Monitor Overview	1-14
Comprehensive Component Monitor (CCM) Explanation	1-15
Monitor Testing Overlap.....	1-15
Drive Cycle Vehicle Preparation Example.....	1-16
OBD II Drive Cycle Example	1-17
Drive Cycle Tips.....	1-18
Inspection/Maintenance (I/M) System Check	1-18
Unmonitored Components, Circuits, & Systems.....	1-19
New Monitors.....	1-20
Secondary Air Monitor Enhancement.....	1-20
PCV Monitor	1-20
Communication & I/M Problem Vehicles	1-21
Readiness Monitor Status Anomalies.....	1-22
OBD II Serviceability Issues TSB.....	1-25

PCV CONTENTS

POSITIVE CRANKCASE VENTILATION

PCV System Construction & Function

Positive Crankcase Ventilation (PCV)	2-1
PCV Operation.....	2-1
PCV Failures.....	2-2

Daimler Chrysler System Variations

PCV Solenoid	2-2
5.7L Hemi PCV Variations	2-2

EGR CONTENTS**EXHAUST GAS RECIRCULATION SYSTEMS****Construction & Function**

EGR Principles3-3

Daimler Chrysler EGR Monitor & Codes

EGR System Monitor3-4

Flow Fault Codes.....3-5

Daimler Chrysler Vacuum EGR

Vacuum EGR Valve Introduction3-6

Solenoids & Transducers3-6

Scan Tool Solenoid PID Test3-7

Scan Tool Bi-Directional Controls3-7

Lab Scope Solenoid Test.....3-8

Vacuum EGR System Wiring Diagram.....3-9

Daimler Chrysler Linear EGR

Linear EGR Valve Introduction.....3-10

Linear EGR Valve Circuits & Operation.....3-10

Lab Scope Linear EGR Valve Test3-11

Lab Scope EGR Position Sensor Test3-12

Solenoid Circuit Fault Code3-13

Position Sensor Fault Codes.....3-13

Linear EGR System Wiring Diagram.....3-13

Ford DPFE EGR

EGR System Overview3-14

Vacuum Management Overview (Solenoid)3-15

Solenoid Resistance Testing.....3-15

Solenoid Scan Tool PIDs3-15

Solenoid Lab Scope Test.....3-16

Solenoid Current Test.....3-17

Solenoid Scan Tool & Voltage Test.....3-18

Solenoid Functional Testing.....3-19

Differential (or Delta) Pressure Feedback (DPFE) Sensor3-20

DPFE Sampling3-21

Common DPFE Faults3-21

Trouble Codes – EGR Performance.....3-22

Trouble Codes – Solenoid.....3-23

Trouble Codes – DPFE Sensor.....3-23

Scan Tool DPFE Test – Null Value3-23

Scan Tool DPFE Test – Normal Operation.....3-24

Scan Tool DPFE Test – Fault Example.....3-25

Lab Scope EGR Flow Test.....3-26

EGR System Monitor3-27

EGR System Wiring Diagram.....3-28

EGR CONTENTS

EXHAUST GAS RECIRCULATION SYSTEMS

General Motors Digital EGR

Digital EGR Valve Overview.....	3-29
Integrated Electronic EGR Valve Overview	3-29
Linear EGR Valve Introduction	3-29
Operating Conditions.....	3-30
Linear EGR Valve Circuits & Operation.....	3-30
Flow Fault Code	3-30
Position Fault Codes	3-31
Control Circuit Fault Code	3-31
Linear EGR Bi-Directional & DVOM Test.....	3-32
Linear EGR Valve & Sensor Test	3-33
EGR System Monitor.....	3-34
EGR System Wiring Diagram.....	3-35

OXYGEN SENSORS & FUEL CONTROL CONTENTS**OXYGEN SENSORS****Sensor Construction & Function**

Sensor Introduction & Identification.....	4-3
Sensor Operation.....	4-4
Downstream Sensor Fuel Control	4-4
Sensor Heaters.....	4-5

Daimler Chrysler Oxygen Sensors

Sensor Circuits & Heater Circuits.....	4-6
Sensor Testing Overview	4-6
Miscalibration Faults	4-7
Scan Tool Tests.....	4-7
Time-To-Activity test	4-9
Expected HO ₂ S Activity	4-10
HO ₂ S Signal 'Hash'	4-11
Slow Response Test.....	4-11
HO ₂ S Monitor – Upstream.....	4-12
HO ₂ S Monitor – Downstream	4-14
Heater Testing Overview.....	4-14
Heater Scan Tool Test	4-14
Heater Bi-Directional Test.....	4-15
Heater Voltage Tests – JTEC, SBEC, & NGC.....	4-17
Heater Diagnostic Pulse Test - NGC.....	4-18
HO ₂ S Heater Monitor	4-19
HO ₂ S Trouble Codes.....	4-20
HO ₂ S Heater Control Circuit Trouble Codes.....	4-20
HO ₂ S Heater Performance Trouble Codes.....	4-21
HO ₂ S Wiring Diagrams.....	4-22

Ford Oxygen Sensors

Sensor Circuits & Heater Circuits.....	4-25
Sensor Testing Overview	4-25
Time-To-Activity Test	4-26
Slow Response Test.....	4-27
Expected HO ₂ S Activity (Cruise)	4-27
'Sticky' Sensor Fault Example.....	4-28
HO ₂ S Monitor & Trouble Codes.....	4-29
Heater Testing Overview.....	4-31
Heater Scan Tool Testing	4-31
Heater Resistance Testing.....	4-31
Heater Circuit Voltage & Current Testing	4-32
HO ₂ S Heater Monitor & Trouble Codes	4-33
HO ₂ S Wiring Diagrams.....	4-34

OXYGEN SENSORS & FUEL CONTROL CONTENTS

OXYGEN SENSORS

General Motors Oxygen Sensors

Sensor Circuits..... 4-36

Heater Circuits 4-36

Sensor Testing Overview 4-37

Scan Tool Test..... 4-37

Time-To-Activity Test 4-38

Slow Response Test 4-40

Expected HO2S Activity (Cruise)..... 4-41

HO2S Monitor 4-42

Heater Testing Overview..... 4-43

Heater Scan Tool Testing..... 4-43

Heater Bi-Directional Testing..... 4-43

Heater Voltage Testing..... 4-44

HO2S Heater Monitor..... 4-44

HO2S Trouble Codes 4-45

HO2S Heater Trouble Codes 4-46

HO2S Wiring Diagrams..... 4-47

Wide Range Sensor Introduction & Advantages..... 4-48

WRAF Circuits..... 4-48

WRAF Sensor Operation..... 4-49

Scan Tool Testing – Lambda..... 4-49

Lambda Values 4-49

WRAF Sensor Diagnosis..... 4-50

Fuel Trim

Basic Fuel Control..... 4-51

Open & Closed Loop 4-51

General Motors Closed loop Variations 4-52

Adaptive Fuel Control (Fuel Trim)..... 4-52

Fuel Trim Units & Range 4-53

General Motors Fuel Trim Units..... 4-53

Long & Short term Fuel Trim Relationship..... 4-53

Fuel Trim & HO2S Relationship..... 4-54

Fuel Trim Tables 4-54

Fuel Trim Reset..... 4-56

Diagnosing By Resetting Fuel Trim 4-57

Daimler Chrysler, Ford, & GM Scan Tool Tests..... 4-57

Simplified Fuel Trim Monitor Explanation 4-60

Fuel Trim Monitor – Daimler Chrysler, Ford, & General Motors..... 4-61

Fuel Trim Trouble Codes..... 4-61

CONVERTERS & AIR INJECTION CONTENTS**CATALYTIC CONVERTERS****Construction & Function**

The Need for Catalysts & Catalyst Types.....	5-2
Catalyst Operating Temperatures	5-3
Catalyst Failures & Air Injection Reaction Systems	5-3
Converter Chemistry	5-4
Catalyst Effectiveness & Catalyst Monitor Logic.....	5-5

Daimler Chrysler

Monitor Conditions – SBEC, JTEC, & NGC.....	5-6
Catalyst Monitors	5-6
Catalyst Efficiency Trouble Codes	5-7

Ford Motor Company

Converter Efficiency Monitor & Switch Ratio Method	5-8
Switch Ratio Driving Pattern	5-9
Index Ratio Method & General Catalyst Monitor Operation	5-9
Trouble Codes	5-10

General Motors

Converter Efficiency Monitor	5-11
Converter Efficiency Monitor Logic	5-12
Catalyst Efficiency Trouble Codes	5-12

Catalyst Efficiency Testing

Catalyst Testing Overview & Rattle Test.....	5-13
Exhaust Backpressure & Catalyst Temperature Tests	5-14
Gas Analyzer Test – Before & After and Cranking HC	5-15
Catalyst Scan Tool Test.....	5-16

AIR PUMPS**Air Injection Overview**

General Operating Modes & Belt Driven Systems.....	5-18
Belt Driven System Wiring Example.....	5-19

Ford Electric Air Pumps

Electric Air Pump Overview & Operation.....	5-20
Bypass Solenoids & System Scan Tool Testing.....	5-21
Electric Air Pump – Fault Example.....	5-22
Air Pump Current Test	5-23
Secondary Air Monitor & Trouble Codes.....	5-24
Electric Pump System Wiring Diagram.....	5-26

General Motors Electric Air Pumps

Air Injection Overview	5-27
Air Injection Components.....	5-28
System Disabling Conditions.....	5-28
AIR System Diagnosis & Bi-Directional Test	5-29
Air Pump Current Test & System Trouble Codes	5-30

EVAP SYSTEMS CONTENTS**EVAPORATIVE EMISSIONS SYSTEMS****Construction & Function**

The Hydrocarbon Problem	6-5
EVAP System Overview.....	6-5
EVAP System Components	6-6
Charcoal Canister	6-6
System Vapor Flow.....	6-7
Canister Vapor Flow	6-8
Canister Failures.....	6-8
Purge Solenoid	6-9
Solenoid Faults.....	6-9
Solenoid Controls.....	6-9
EVAP System Test Port & Vent Solenoid.....	6-10

Daimler Chrysler

Typical EVAP System Graphics.....	6-11
Purge Solenoid Trouble Codes	6-12
Proportional Purge Solenoid – Purge Sense	6-12
Scan Tool Purge Solenoid Test	6-12
Scan Tool Bi-Directional Tests – KOEO.....	6-14
Scan Tool Bi-Directional Tests – KOER	6-14
DVOM/GMM Purge Solenoid Test	6-15
Lab Scope Purge Solenoid Test – Conventional	6-16
Purge Solenoid Current Test – Conventional	6-17
Lab Scope Purge Sense Test – Proportional	6-17
Lab Scope Purge Solenoid Test – Proportional	6-18
Onboard Refueling Vapor Recovery (ORVR).....	6-19
EVAP Monitor Overview.....	6-20
Purge Flow Monitor Conditions – SBEC	6-20
Purge Flow Monitor Conditions – JTEC	6-20
Purge Flow Monitor Conditions – NGC	6-20
Purge Flow Monitor Process	6-21
Leak Detection Pump System Introduction.....	6-21
EVAP System Leak & Performance Codes – LDP	6-22
LDP Solenoid Trouble Codes.....	6-22
LDP Switch Trouble Codes	6-22
LDP EVAP Monitor Differences.....	6-22
LDP Monitor Explanation	6-23
LDP Pump Mode.....	6-23
LDP Test Mode.....	6-23
Missing/Loose Gas Cap.....	6-24

EVAP SYSTEMS CONTENTS**EVAPORATIVE EMISSIONS SYSTEMS****Daimler Chrysler - Continued**

LDP System TSB	6-24
Scan Tool Bi-Directional Tests – LDP EVAP Monitor	6-25
Lab Scope Test – LDP Solenoid	6-26
Lab Scope Test – LDP Monitor	6-26
Natural Vacuum Leak Detection (NVLD) Overview.....	6-27
NVLD Components	6-27
NVLD Solenoid.....	6-27
EVAP System Leak & Performance Codes – NVLD	6-28
NVLD Component Trouble Codes	6-28
NVLD Rationality & Flow Check	6-29
NVLD Small Leak Test.....	6-29
NVLD Medium & Large Leak Test.....	6-30
NVLD Switch Trouble Codes.....	6-30
NVLD Scan Tool PID Test.....	6-31
NVLD Solenoid Current Testing	6-31
Lab Scope NVLD Solenoid Test.....	6-32
EVAP System Wiring Diagrams.....	6-33

Ford Motor Company

Ford-Specific Component Overview	6-37
System Vapor Flow	6-38
Vent Solenoid Trouble Codes.....	6-38
Vent Solenoid Scan Tool PID Test	6-39
Vent Solenoid Scan Tool Bi-Directional Test.....	6-39
Vent Solenoid Resistance Test	6-40
Purge Solenoid/Vapor Management Valve.....	6-41
Purge Solenoid/VMV Trouble Codes.....	6-42
Purge Solenoid/VMV Resistance Test.....	6-42
Purge Solenoid/VMV Scan Tool Test	6-43
Lab Scope Purge/VMV Solenoid Test	6-44
Purge Solenoid/VMV Current Test	6-45
Purge Flow Sensor & Sensor Testing.....	6-46
Fuel Tank Pressure Sensor.....	6-47
Pressure Sensor Calibration.....	6-48
Fuel Tank Pressure Sensor Trouble Codes.....	6-48
Pressure Sensor Scan Tool Test.....	6-49
Onboard Refueling Vapor Recovery (ORVR)	6-49
EVAP Monitor Drive Cycle	6-50

EVAP SYSTEMS CONTENTS

EVAPORATIVE EMISSIONS SYSTEMS

Ford Motor Company - Continued

EVAP Monitor Process.....	6-51
Monitor Trouble Codes	6-51
EVAP Monitor – Some Late Model	6-52
Late Monitor Type Overview	6-52
0.020” Leak Check Overview	6-53
Monitor Enabling Conditions	6-53
Monitor Abort Conditions For Phase 2	6-54
Phase 0: Vacuum Build.....	6-54
Phase 1 & 2: Vacuum Stabilization & Vacuum Hold & Decay.....	6-55
Phase 3 & 4: Vacuum Release & Vapor Generation	6-56
Idle Check	6-56
